# Safety instructions

## EN WARNING!

### Assembly and installation instructions

#### **⚠ WARNING!**

1. It's very important to properly attach the frame padding securely to the frame and in correct position prior to using the trampoline.
2. Adequate overhead clearance is essential. A minimum of 24 ft from ground level is recommended. Provide clearance for wires, tree limbs, and other possible hazards
3. Lateral clearance is essential. Place the trampoline and enclosure away from walls, structures, fences, and other play areas. Maintain a clear space on all sides of the trampoline.
4. Place the trampoline and enclosure on a level surface before use.
5. Use the trampoline and enclosure in a well-lit area. Artificial

illumination may be required for indoor or shady areas.

6. Secure the trampoline and enclosure against unauthorized and unsupervised use.
7. Remove any obstructions from beneath the trampoline and enclosure
8. The trampoline enclosure is only to be used as an enclosure for a trampoline of a size for which the enclosure is designed.
9. The owner and supervisors of the trampoline are responsible to make all users aware of practices specified in the use instructions.

### Care and Maintenance Instructions

Inspect the trampoline and enclosure before each use and replace any worn, defective, or missing parts. The following conditions could represent potential hazards:

- (1) Missing, improperly positioned, or insecurely attached frame padding, or barrier and pole caps.
- (2) Punctures, frays, tears, or holes worn in the bed or frame padding or in the barrier
- (3) Deterioration in the stitching or fabric of the bed or frame padding, or barrier
- (4) Ruptured springs,
- (5) A bent or broken frame,
- (6) A sagging bed, or barrier
- (7) Sharp protrusions on the frame or suspension system.

### Use Instructions

#### **⚠ WARNING!**

1. DO NOT attempt or allow somersaults. Landing on the head or neck can cause serious injury, paralysis, or death, even when landing in the middle of the bed.
2. Do not allow more than one person on the trampoline. Use by more than one person at the same time can result in serious injuries.
3. Use trampoline and enclosure only with mature, knowledgeable supervision.
4. Trampolines over 20 in. (51 cm) tall are not recommended for use by children under 6 years of age.
6. Inspect the trampoline and enclosure before each use. Make sure the barrier the frame padding is correctly and securely positioned. Replace any worn, defective, or missing parts.

6. Climb on and off the trampoline. It is a dangerous practice to jump from the trampoline to the floor or ground when dismounting, or to jump onto the trampoline when mounting. Do not use the trampoline as a springboard to other objects.

7. Stop bounce by flexing knees as feet come in contact with the trampoline bed. Learn this skill before attempting others.

8. Learn fundamental bounces and body positions thoroughly before trying more advanced skills. A variety of trampoline activities can be carried out by performing the basic fundamentals in various series and combinations, performing one fundamental after another, with or without feet bounces between them.

9. Avoid bouncing too high. Stay low until bounce control and repeated landing in the center of the trampoline can be accomplished. Control is more important than height.

10. While keeping the head erect, focus eyes on the trampoline toward the perimeter. This will help control bounce.

11. Avoid bouncing when tired. Keep turns short.

12. Properly secure the trampoline when not in use. Protect it against unauthorized use. If a trampoline ladder is used, the supervisor should remove it from the trampoline when leaving the area to prevent unsupervised access by children under 6 years of age.

13. Do not use or stand near the trampoline in windy or gusty conditions. A trampoline can become airborne when exposed to sustained wind or gusting wind conditions. This can result in serious injury, paralysis, or death, as well as property damage. To reduce these risks, disassemble the trampoline and enclosure and store them until weather conditions improve. Anchoring a trampoline frame may prevent the trampoline from moving as a result of the wind, but even anchored trampolines can become airborne or damaged. Consult a qualified contractor to determine what type of anchor works best in your location.

14. Keep objects away which could interfere with the performer. Maintain a clear area around the trampoline.

15. Do not use the trampoline while under the influence of alcohol or drugs.

16. For additional information concerning the trampoline equipment, contact the manufacturer.

17. For information concerning skill training, contact a certified

trampoline instructor.

18. Bounce only when the surface of the bed is dry. Wind or air movement should be calm to gentle. The trampoline must not be used in gusty or severe winds.

19. Read all instructions before using the trampoline and enclosure. Warnings and instructions for the care, maintenance, and use of this trampoline are included to promote safe, enjoyable use of this equipment.

20. User may become entangled in or strangled by loose cords or in gaps between trampoline and enclosure.

21. Keep the enclosure tightly fastened to the trampoline in accordance with the manufacturer's instructions. Failure to properly assemble and maintain a tight, secure trampoline/enclosure boundary may result in serious injury, strangulation, or death.

22. Do not attempt to jump over the barrier.

23. Do not attempt to crawl under the barrier.

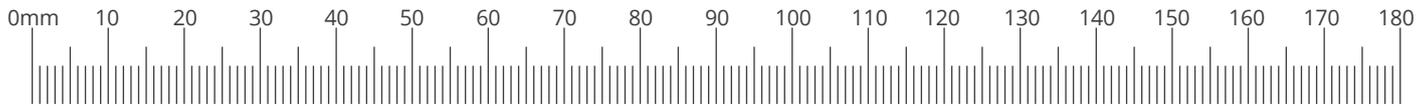

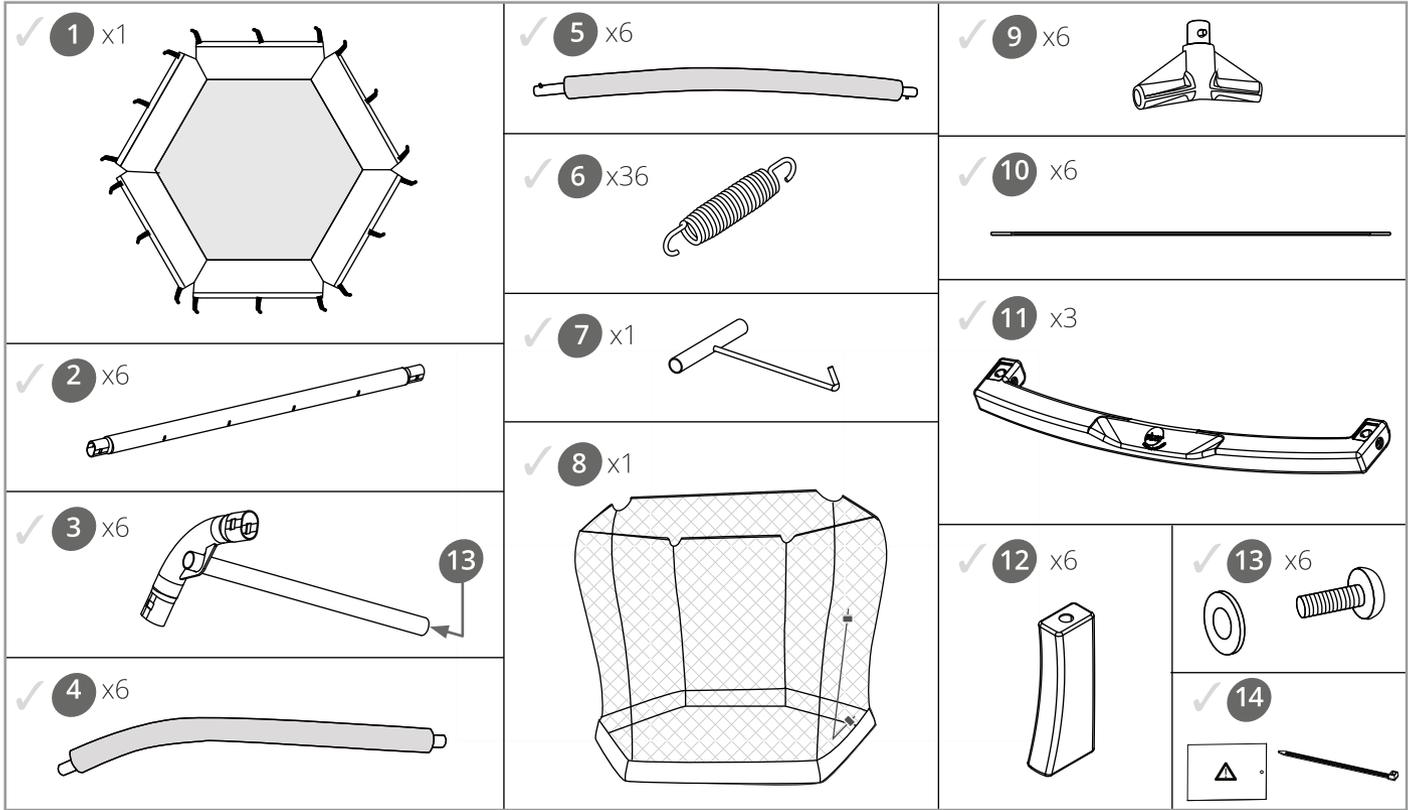

24. Do not intentionally rebound off the barrier.

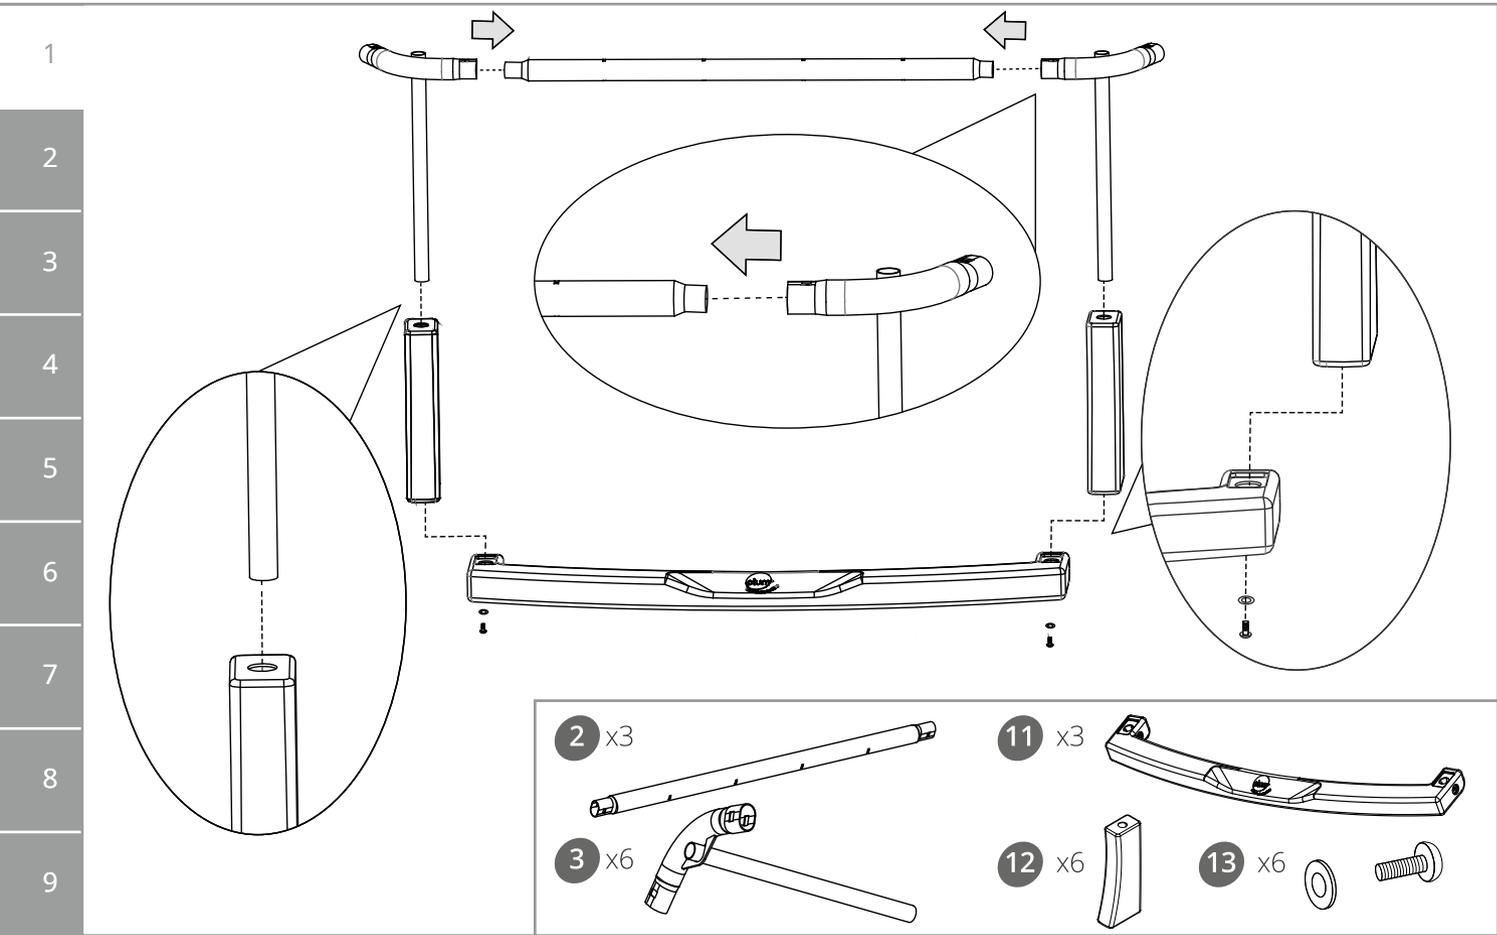

25. Do not hang from, kick, cut, or climb on the barrier.

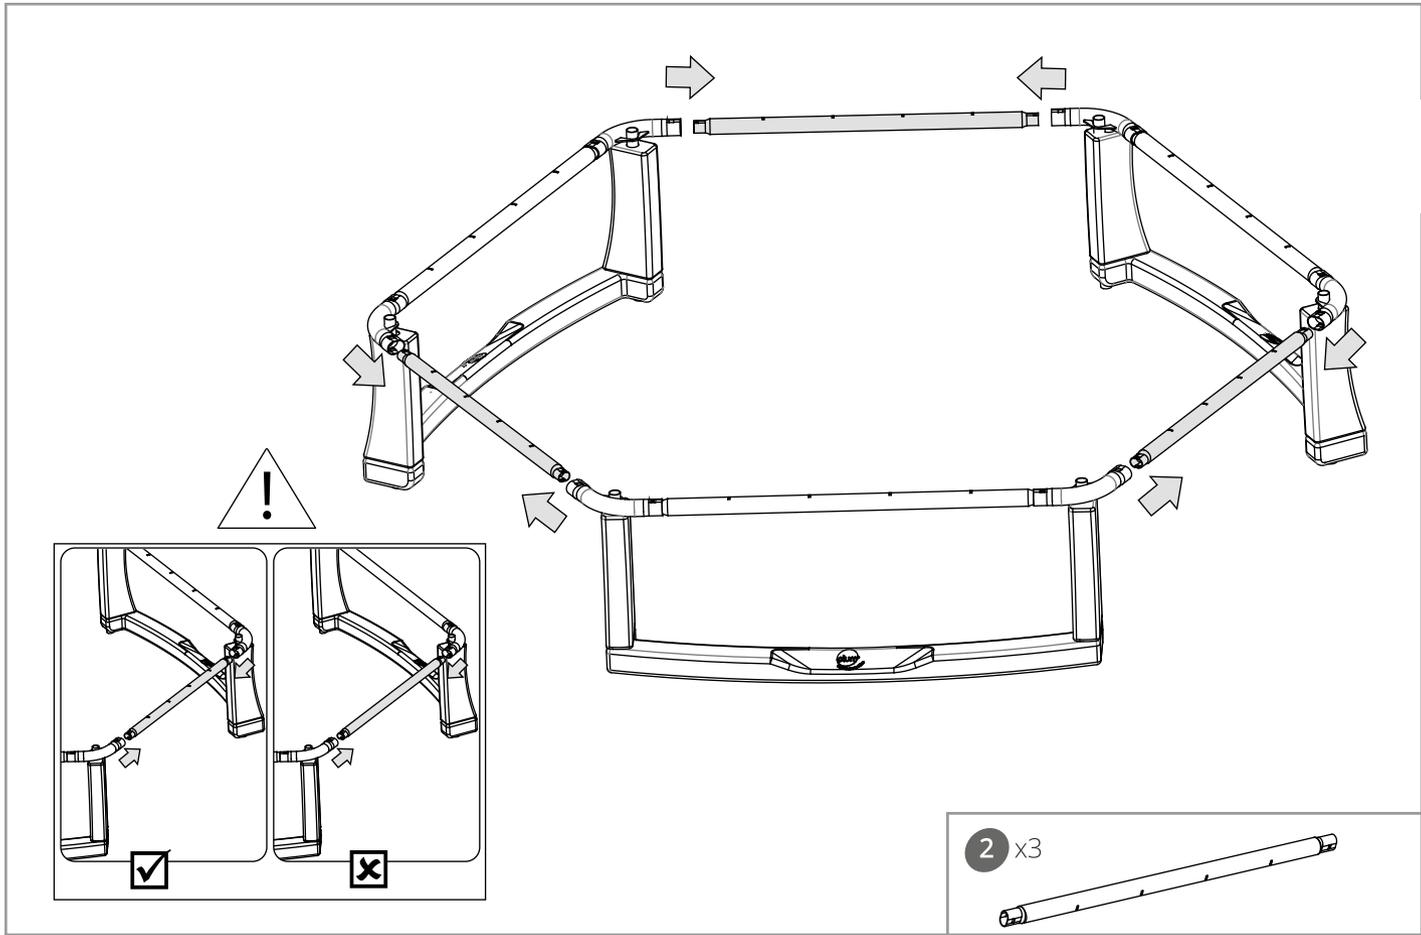

26. Do not attach anything to the barrier that is not a manufacturer-approved accessory or part of the enclosure system.

27. Enter and exit the enclosure only at the enclosure door or barrier opening designated for that purpose.

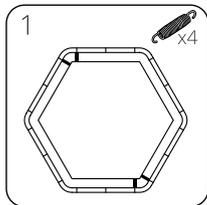

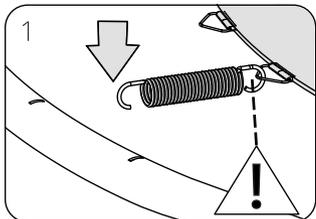

28. Wear clothing free of drawstrings, hooks, loops or anything that could get caught while using the trampoline/enclosure and result in entanglement or strangulation, or both.
